Surveying Experience and Capabilities

Burse Surveying and Engineering, Inc. has been providing land surveying services to private and governmental clients in southern Wisconsin since 1999. Our staff of Professional Land Surveyors and Technicians fully understands the necessity of collecting accurate data. We utilize the latest robotic and GPS surveying equipment, as well as AutoCAD® and Civil 3D® software, to provide timely and cost-effective solutions. We have a thorough knowledge of the Wisconsin Department of Transportation (WisDOT) surveying and staking requirements and have worked on many WisDOT projects. In fact, WisDOT awarded Burse Surveying and Engineering two-year Master Contracts in 2010 and 2012, recognizing our expertise and abilities. Our long-term relationships working with the Cities of Madison and Middleton are also testaments to the quality and responsiveness of our work.
