Engineering Experience and Capabilities

Burse Surveying and Engineering, Inc. has been providing engineering services to private and governmental clients since 1999. Our staff of Professional Engineers and Technicians has the experience and knowledge to prepare plans and specifications for private developments and public infrastructure projects. Our expertise in state and local requirements, coupled with our experience in site design and construction, has been a cornerstone of our success. Burse Surveying and Engineering, Inc. can help you meet projects goals for state and federally funded projects. We are certified as a Disadvantage Business Enterprise (DBE) with the Wisconsin Department of Transportation and as a Woman Owned Business Enterprise (WBE) with Dane County and the Department of Administration. Our clients rely on our efficient and creative solutions to their unique problems that we execute with technical excellence from the planning stages through construction.
